Objectives

Pursuing a degree in Computer Science & Engineering with a specialization in Software Developer. Possess a strong foundation in Core Java, object-oriented programming, and problem-solving. Eager to apply and contribute to the success of technology-driven projects.

SKILLS AND INTERESTS

Programming Languages	Java
Frontend Technologies	HTML, CSS, Bootstrap, React Js, Tailwind CSS and Express Js
Backend Technologies	Core Java, OOP, JDBC
Database	MySQL and MongoDB.
Version Control Tools and IDE	Git, GitHub, Vs Code, Eclipse

EDUCATION

Priyadarshini College of Engineering, Nagpur (2022 – 2026)

Bachelor of Engineering (B.E/B.Tech) – Computer Science & Engineering
CGPA: 6.77

Maharashtra Vidhyalaya Jr. College, Khaperkheda (2021)

HSC – Maharashtra State Board Of Secondary Education, Pune
Percentage: 82.50%

St. Andrews English School, Walni Mines (2019)

SSC – Maharashtra State Board Of Secondary Education, Pune
Percentage: 79.20%

CERTIFICATIONS

- Oracle Cloud Infrastructure Foundations Associate
- SQL Certificate – HackerRank.
- Data Structure & Algorithm JAVA Certificate – Apna College.
- Cyber Security & Ethical Hacking Certificate – Tech Maghi.
- Diploma in Programming Language (C, C++, Core Java & Python) – Atlanta Computer Institute Nagpur.

PROJECTS

➤ Unifind – Lost and Found Items in Campus.

Technologies: HTML, CSS, JavaScript, Bootstrap, Supabase

- Developed a campus-based web application to report, search, and recover lost and found items efficiently.
- Implemented secure user authentication and role-based access control.
- Designed features for posting, searching, filtering, and updating item status (lost/found/returned).
- Built an admin moderation system to manage posts and ensure data accuracy.
- Created a fully responsive and user-friendly interface to enhance accessibility and usability.

➤ Banking Application

Technologies: Core Java, OOP, JDBC, MySQL, Exception Handling, Collections.

- Designed and developed a Java-based banking application simulating real-world banking operations.
- Implemented secure user authentication using PIN validation.
- Developed features for account management, balance inquiry, deposits, withdrawals, and transaction history tracking.
- Integrated MySQL database using JDBC for persistent data storage.
- Applied robust exception handling to manage invalid inputs and insufficient balance scenarios.

INTERSHIPS & ACHIEVEMENTS

Google Cloud Arcade Program :-

- Completed the Google Cloud Arcade Cohort, mastering 20+ hands-on labs on GCP services like Big Query, Kubernetes, and Cloud Functions.
- Built and deployed cloud-native apps, automated tasks, and analyzed data using real-world scenarios on Cloud Skills Boost.

Web Development Trainee | ICEICO Technologies Pvt. Ltd.

- Successfully completed hands-on training in HTML, CSS, JavaScript, and React, building multiple responsive web applications from scratch.

Google AI-ML Virtual Internship | AICTE EDUSKILLS Cohort 7

(Jan - Mar 2024)

- The internship covers various topics, including TensorFlow and Pandas prepares participants for job roles like Data Scientist, Machine Learning Engineer, or contact center engineer.

Palo Alto Cybersecurity Virtual Internship | AICTE EDUSKILLS Cohort 8

(Apr - Jun 2024)

- The cybersecurity technologies, helping participants develop skills in threat detection, incident response, and security analytics.
